About the GetSimple Project

GetSimple is an XML based lite content management system that is intended to be used on small business websites.

GetSimple was born out of one designer's need for a powerful yet simple CMS solution for his clients back in 2008. Today it has grown into the most respected and easy-to-use open-source lite CMS available.

With 40,000 (and growing) downloads since first being released to the public in August 2009, GetSimple has positioned itself as the goto product in the lite CMS niche.

GetSimple has a vibrant community in the forums along with dozens of developers submitting patches, suggestions and plugins everyday.

GetSimple also has created the Extend platform, which allows developers to upload their GetSimple related plugins and themes to a central repository.

Testimonials from GetSimple Users

You deserve high praise for this elegantly coded software. -design7 [forums]

GetSimple is a very smart CMS delivering the necessary while not distracting with the needless. -wizzy [forums]

I have to say that I am really amazed at how well put together this database-less script is. -Mitch [email]

We are excited to offer this new CMS option to our web design clients. -Pixelita Designs

This product is AMAZING. Can't wait to see where it goes. -crashfellow [forums]

This is a great tool for smaller sites and non-techie site owners. -schwoortz [forums]

Thanks for producing Get Simple. So far it is the best of the many solutions I've tried. True to its claim that it offers everything I need and nothing that I don't need. A very elegant and flexible solution. -Spike [email]
